COLLOIDS AND SURFACES A

Subject Index

Adsorption, 271
Alkanoic acid, 299
Anisotropy, 179
Anisotropy of electrical polarizability, 107
Anisotropy of electric polarizability, 75
AOT, 291
Aqueous solutions, 213
Attapulgite, 61

Bacteriorhodopsin, 113
Bentonite, 43
Biaxiality, 179
Birefringence, 17
Bitumen, 199

Calcium activation, 199
Carbon, 271
Cetylpyridinium chloride, 43
Charge density, 163
Chemical shift, 245
Clay minerals, 61
CMC, 299
Coagulation, 199
Colloidal crystals, 87
Colloidal electro-optics, 83
Colloidal particles, 75
Colloidal stability, 231
Conductance, 163
Conducting polymer, 155
Conducting properties, 291
Conductivity anisotropy, 9, 29
Core dipole moment, 95
Counter-ion, 305
Counterions, 163
Counter-ion species, 149
Critical micelle concentration, 213
CTAB, 299

Deionized purple membranes, 113
Dichroism, 17
Differential absorbance, 299
Diffusion constant, 135
Dipole moment, 29
Director fluctuations, 179
Distribution function, 29
DNA, 107
D38R mutant, 113
Droplet, 223, 283
Dynamic light scattering, 291

Electric birefringence, 149, 155
Electric dipole moments, 43
Electric field, 283
Electric light scattering, 35
Electric polarizability, 35, 113
Electro-acoustic waves in colloids, 83
Electro-fluorescence, 61
Electro-optical methods, 29
Electro-optics, 3, 9, 17, 87
Electrophoresis, 191
Electrophoretic mobility, 35, 135
Electrostatic potential, 191
Enthalpy of adsorption, 271
Enthalpy of immersion, 271
EPC vesicle, 191
Exhibited properties, 305
External electric field, 135

Fractal aggregates, 35

Globular proteins, 95

Hamaker constant, 191
Hectorite, 61
High-frequency relaxation, 149
Hydrophobic interaction, 199, 299

Interfacial phenomena, 199
Interfacial tension, 191, 259
Intra-chain conduction, 155
Ion-atmosphere fluctuation, 43
Ionenes, 163

PII: S0927-7757(99)00006-0

Kemp's triacid, 259

Light scattering and absorption, 17
Low frequency anomalies in colloidal electro-optics, 83
Low-frequency relaxation, 149

Macromolecules, 3
Magnetic and electric fields, 179
Magneto-optics, 9
Main-chain conformation, 155
Membrane leakage, 191
Metal complexation, 259
Metropolis Monte Carlo simulation, 107
Microemulsion, 245
Mixed reverse micelles, 291
Modulation, 87
Molal volume, 213
Monte-Carlo simulation, 223

N-Alkylaldonamide, 245
Nematic liquid crystal, 179
Non-wetting regime, 223
Nucleation, 283

Oil, 191
Oil-in-water emulsions, 259
Optical anisotropy of DNA, 121

Partial wetting regime, 223
Particle dipole moment, 9
Partition coefficient, 299
Permanent dipole moment, 113
Polarisability, 29
Polyelectrolyte, 149
Polyelectrolyte solution, 135
Poly(3-hexylthiophene), 155
Porosity, 271
Protein database, 95
Protonated DNA, 121
Proton exchange rate, 245

Quasi-elastic light scattering, 135

Relaxation phenomena, 17
Relaxation time, 43, 245
Reversing-pulse electric birefringence, 43

Sepiolite, 61
Shape, 283
Silica, 199
Small particles, 17
Solubilization, 299
Surface activity, 259
Surface charge dipole moment, 95
Surface pressure, 259
Synchronization, 87

Titanium dioxide, 231
T-matrix, 17
Trans-dichlorodiammineplatinum(II), 121
Transient electric birefringence, 75
Transient network structure, 305

Visco-elastic solid, 87

Water adsorption, 271
Water-in-oil microemulsion, 305
Wettability, 223
Worm-like molecular assembly, 305

X-ray crystallography, 95

Zeta potential, 231
